

6. In 1997, which state had the most girls named “Hannah”

The screenshot shows a SQL playground interface. The top toolbar includes a play button, a clock icon, a 'p' icon, a wrench icon, a transaction dropdown set to 'Tx: Auto', a checkmark, a refresh icon, a square icon, a 'Playground' dropdown, and a table icon. The SQL editor contains the following query:

```
1 SELECT US_STATE FROM BABYNAMES
2 WHERE GENDER = 'F' AND NAME = 'Hannah' AND DATE_YEAR = 1997
3 ORDER BY NUM_BABIES DESC
4 FETCH FIRST 1 ROW ONLY
```

The bottom section shows the 'Output' tab with a table titled 'USER.BABYNAMES'. The table has one column, 'US\_STATE', and one row with the value 'CA'.

US_STATE
CA
